 How to Buy

 Technical Specification

FortiClient VPN

Remote Access

- IPsec VPN - Windows, MacOS and Android only
- SSL VPN
- Technical Support

 Download for Windows

 Download for MacOS

 Download for Linux: [.rpm](#) [.deb](#)

 Download for iOS

 Download for Android

Version 6.0

1. After download the setup, install the VPN in your desktop.
2. In New VPN Connection select IPsecVPN.

1. In IPsec VPN Enter Connection Name Which you want to be create like Cuipsec.
2. In Remote gateway enter IP address 112.196.107.43.
3. Enter CU@12345 in Pre-Shared Key.
4. Then Save the settings.

The screenshot shows the FortiClient VPN configuration window. The title bar reads "FortiClient -- The Security Fabric Agent". The window has a menu bar with "File" and "Help". The main header is "FortiClient VPN" with a shield icon and navigation icons. A message says "Upgrade to the full version to access additional features and receive technical support." The main content area is titled "New VPN Connection". It has two tabs: "SSL-VPN" and "IPsec VPN", with "IPsec VPN" selected. The fields are: "Connection Name" (Cuipsec), "Description" (empty), "Remote Gateway" (112.196.107.43), "Authentication Method" (Pre-shared key), and "Authentication (XAuth)" (Prompt on login selected). There are "Cancel" and "Save" buttons at the bottom.
